PROFESSIONAL SUMMARY

Frontend Developer specialized in React, Vue 3, and complex API integrations. Experienced in building production-ready web and mobile applications, handling deep UI state management, and seamlessly integrating secure backend architecture. Adept at writing clean, maintainable code in fast-paced development environments, with a strong understanding of Node.js/Express backends to facilitate seamless client-server communication.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Node.js, HTML5, CSS3

Frameworks & Libraries: React (Functional Components & Hooks), React Native, Vue 3, Express.js

Architecture & UI: Responsive Design, Component-Based Architecture, DOM Manipulation

Tools & Integration: Git, REST APIs, JSON Data Handling, WebSockets, npm, Vite, Webpack, Google Cloud Run, Netlify

ENGINEERING EXPERIENCE

Front End Developer | LasuLearn — Production E-Learning Platform

- Collaborated with a development team to build and maintain a production e-learning web application serving active student users.
- Engineered and shipped the platform's companion mobile application, ensuring cross-platform feature parity and a consistent user experience.
- Integrated RESTful APIs to handle dynamic course data, user authentication, and secure JSON data management.
- Participated in a structured development process using Git for version control, branch management, and collaborative code reviews.

Front End Developer | Veil — Payment & Payroll Solution

- Spearheaded the frontend architecture and seamless integration of a secure payment and automated payroll API utilizing React.
- Managed complex, asynchronous data flow between the client interface and the backend, ensuring accurate state synchronization for financial transactions.
- Engineered responsive, accessible dashboards for SMEs to track real-time payment metrics and user data.

Full-Stack Developer | Stride — Academic Productivity Tool

- Architected and deployed a full-stack course management platform using React and Node.js/Express, establishing optimized database schemas.
- Developed robust server-side controllers for assessment tracking and user mood monitoring features.
- Ensured seamless deployment and environment configuration across client and server architectures.

Software Engineer | Kablux — Ride-Sharing Application

- Architected the front-end interface for a ride-sharing application requiring complex, real-time data handling.
- Integrated WebSockets for live location tracking, managing asynchronous data streams between rider and driver interfaces.
- Utilized browser developer tools to aggressively debug state synchronization issues and ensure seamless live updates.

EDUCATION

Bachelor of Science, Computer Science

University of Uyo • Uyo, Akwa Ibom, Nigeria

Expected Graduation: 2027
